

SANTIAGO DE LA RIVERA

15 MARCH 2012

Dear Robert,

I would like to record my thanks for your healing services over the past few months.

When I left hospital in September having contracted their infamous bug "Pseudomonas Aeruginosa" I felt very weak and helpless and faced four months of nebulizer antibiotic treatment in the hope of a recovery!

My first visit to you was a few days after leaving the hospital. It was that visit and what you did that kick started my recovery.

A week later another meeting and thank you, you finished the job.

Since then another ailment surfaced in the form of an arthritic hip, I thought!

After coping with excruciating pain for two weeks - you sorted it!

Thankyou Robert.

Yours sincerely
Santiago de la Rivera
